

## LAB: 05

### Case Study

Based on the following case-study, you need to compile a FULL forensics report with screenshots (visible background) and explanations that answers following questions.

1. Who is Joe Jacob's supplier of marijuana and what is the address listed for the supplier?

**Ans:** Jacob's marijuana supplier's name "Jimmy Jungle" and his address is "626 Jungle Ave Apt 2, Jungle, NY 11111" found from the mail that Joe Jacob sent and found during investigating the drive.

2. What crucial data is available within the coverpage.jpg file and why is this data crucial?

**Ans:** According to email that Joe Jacob sent to Jimmy Jungle, "coverpage.jpg" file likely contains data on marijuana details however from the hex values of the file we can say that the file values were all changed to "F6" suggesting either the sectors were wiped so that the file can not be recovered or they were changed which made it unrecoverable. By the hex values and its presence in disk suggests that it was created just for distraction. However, we can extract the metadata of the file from it.

3. What (if any) other high schools besides Smith Hill does Joe Jacobs frequent?

**Ans:** Other than Smith Hill, Joe Jacob has conducted his business in Key High School, Leetch High School, Birard High School, Richter High School and Hull High School. Which was discovered in zip file recovered from the drive, it was fragmented to hide the evidence which was password protected. This password was found during inspection of disk hidden as "pw=goodtimes".

4. For each file, what processes were taken by the suspect to mask them from others?

**Ans:** Using Autopsy, 3 files were recovered. 1) "Jimmy Jungle.doc" – was found to be deleted. 2) "cover page.jpgc" – from the extension of file, we can see that it was change from ".jpg" to ".jpgc" however the file itself was unreadable even after changing the extension, which on further inspection revealed that the hex values were also changed from original data to "F6" which made it impossible to recover back, 3) "Scheduled Visits.exe" – This file has ".exe" extension however the hex values suggests that it is a zip file however it is incomplete and can not be extracted.

5. What processes did you (the investigator) use to successfully examine the entire contents of each file?

**Ans:** Firstly, opening the given image file in Autopsy software to analyse the content of the given image file from which 3 files were discovered which were either deleted or tempered with using different methods.

|                                                                                     |                        |                    |                      |       |
|-------------------------------------------------------------------------------------|------------------------|--------------------|----------------------|-------|
|  | 6-Jimmy Jungle.doc     | 2025-06-13 2:38 PM | Microsoft Word 97... | 20 KB |
|  | 7-cover page.jpgc      | 2025-06-13 2:38 PM | JPGC File            | 1 KB  |
|  | 9-Scheduled Visits.exe | 2025-06-13 2:38 PM | Application          | 1 KB  |

After recovering the files and analysing each file's hex values it was discovered that "cover page.jpgc" has wrong extension and also there were no readable data on it, which suggests that disk wipe or data manipulation was done to hide it. However the file's metadata can be recovered, it did not have all the data, but the creation, modification and access dates and times were found.

Next, on analysing hex values on "Scheduled Visits.exe", it was discovered that the file is ".zip" and not an executable however it was not whole.

Now, performing same using FTK imager software, a new file was discovered "SCHEDU~1.EXE.FileSlack" which from its hex values suggests it's a ".zip" making it look like ".exe" file whose extension was changed from ".exe" to ".FileSlack" however this file is also resulted as corrupted and it was ending in similar hex vales as "Scheduled Visits.exe" which suggests that both files are part of same file but were separated. So, I combined both file using HxD software, from the hex values it is clear that "Scheduled Visits.exe" is first part of the whole file and "SCHEDU~1.EXE.FileSlack" is second part. Combining both resulted in a new file. Which was ".zip" however it required a password to extract it.

Joe Jacobs, 28, was arrested yesterday on charges of selling illegal drugs to high school students. A local police officer posed as a high school student was approached by Jacobs in the parking lot of Smith Hill High School. Jacobs asked the undercover cop if he would like to buy some marijuana. Before the undercover cop could answer, Jacobs pulled some out of his pocket and showed it to the officer. Jacobs said to the officer "Look at this stuff, Colombians couldn't grow it better! My supplier not only sells it direct to me, he grows it himself."

Jacobs has been seen on numerous occasions hanging out at various local high school parking lots around 2:30pm, the time school usually ends for the day. School officials from multiple high

schools have called the police regarding Jacobs' presence at their school and noted an increase in drug use among students, since his arrival.

The police need your help. They want to try and determine if Joe Jacobs has been selling drugs to students at other schools besides Smith Hill. The problem is no students will come forward and help the police. Based on Joe's comment regarding the Colombians, the police are interested in finding Joe Jacob's supplier/producer of marijuana.

Jacobs has denied selling drugs at any other school besides Smith Hill and refuses to provide the police with the name of his drug supplier/producer. Jacobs also refuses to validate the statement that he made to the undercover officer right before his arrest. Upon issuing a search warrant and searching of the suspect's house the police were able to obtain a small amount of marijuana. The police also seized a single floppy disk, but no computer and/or other media was present in the house.

The police have imaged the suspect's floppy disk and have provided you with a copy. They would like you to examine the floppy disk and provide answers to the previous questions. The police would like you to pay special attention to any information that might prove that Joe Jacobs was in fact selling drugs at other high schools besides Smith Hill. They would also like you to try and determine if possible who Joe Jacob's supplier is. Jacob's posted bail set at \$10,000.00. Afraid he may skip town; the police would like to get him locked up as soon as possible. To do so, the police have asked that you have the results fully completed and submitted as soon as possible. Please provide the police with a strong case consisting of your specific findings related to the questions, where the findings are located on the disk, processes and techniques used, and any actions that the suspect may have taken to intentionally delete, hide and/or alter data on the floppy disk.
